AISLE CONTAINMENT

NEXPAND

AISLE CONTAINMENT

Aisle containment is the solution to the challenges which data centers have been presented with since day one: the optimisation of cooling and energy-efficiency through the separation of hot and cold airflows.

With the **Nexpand Corridor**, Minkels offers data center managers and owners 'future-proof' solutions which offer the flexibility and modularity needed to be able to anticipate the dynamic of the modern day data center. Minkels offers the best solution for every situation with the Nexpand Corridor.

The Nexpand Corridor is the ultimate answer to the ever increasing demand for flexible and modular solutions. In the form of the Nexpand Corridor, Minkels lifts modular thinking and energy-efficient data center design to a higher level. Important features of the Nexpand Corridor are:

MODULARITY

Through the highly modular concept of the Nexpand Corridor, Minkels offers extensive possibilities to implement a Corridor solution in a phased and thus cost-efficient manner.

FLEXIBILITY

Because of its modular design, the Nexpand Corridor is flexible and thus can be adapted to fit the specific building environment.

EASE OF INSTALLATION

Modularity in the construction details ensure that the solution is easily and cost-efficiently installed.

ENERGY-EFFICIENCY

With the Nexpand Corridor, Minkels offers a solution which is more energy-efficient than other Corridor-models on the market.

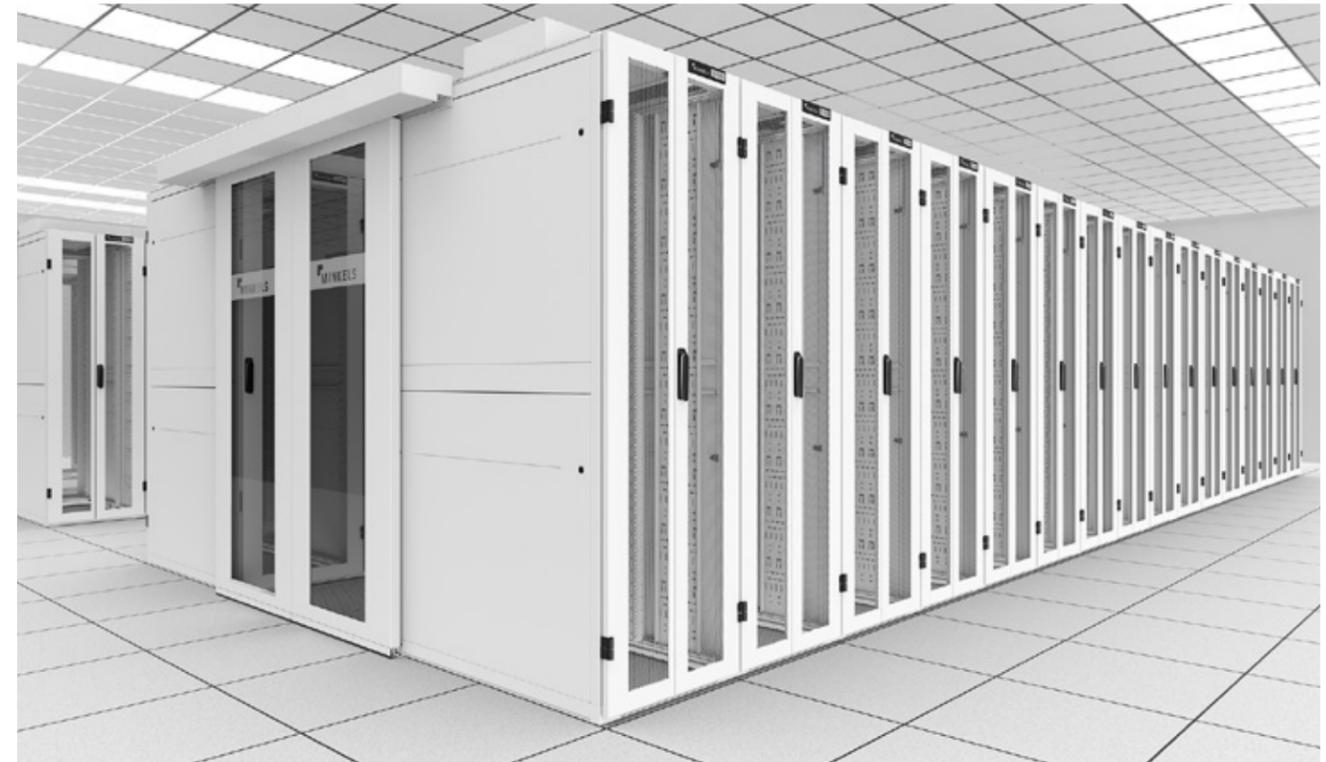

OPTIMAL INTEGRATION

The Nexpand Corridor can be integrated with row-based cooling systems which bring cooling close to the heat source, but also with more traditional forms of cooling which require a raised floor. In addition, this concept offers plug & play integration with e.g. fire detection and suppression systems, monitoring sensors and access control.

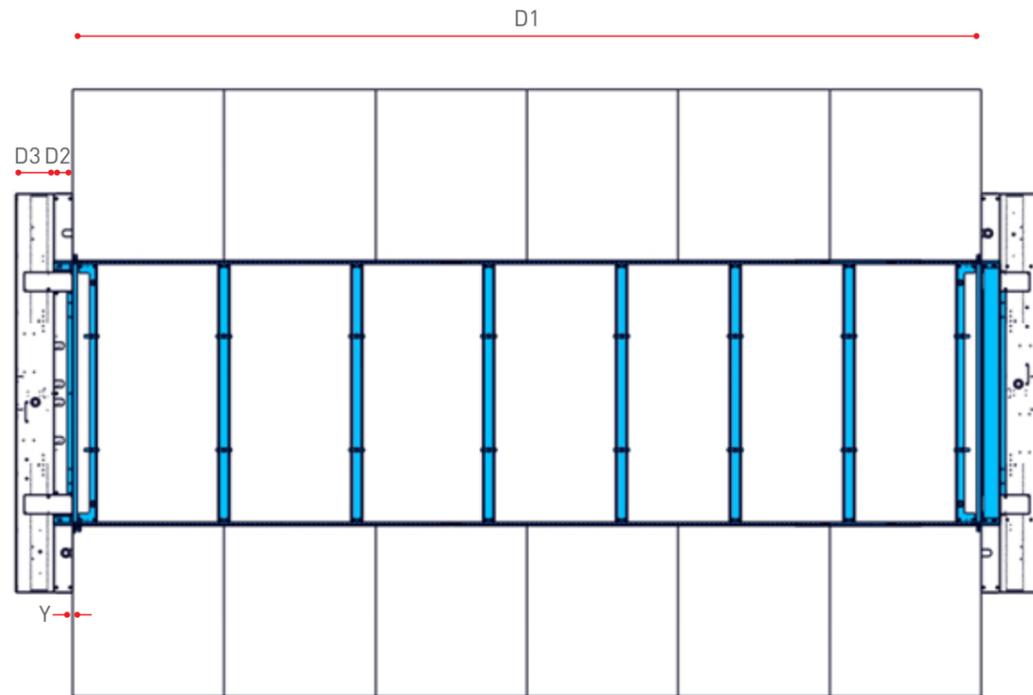

Corridor - Standard		
Aisle width	mm	Variable between 1000-1800 Standard width: 1200 & 1800
Overall width	mm	Aisle width + 200
Standard row height	mm	2000/2200/2450
Overall height	mm	Row height + 55.5 / 135.5 (no accessories / accessories allowed)
Colours		RAL 9003 (white) / RAL 9005 (black)
Materials		Powder coated sheet metal
Working conditions		Max. 5 - 40°C / 20 - 80% RV
Standardisation		CE

Portal - optional		
Depth	mm	100
Total width portal	mm	2100
